BirdXPeller PRO (BXP-AU)

Programmable sonic species-specific bird repeller
All-in-one unit covers up to 1 acre.

**Control birds indoors or outdoors with sophisticated sonic technology.
Sonic programmable bird repeller uses birds' own natural distress calls
to create a "danger zone."**

- Sounds play for a few seconds each cycle. Cycle length may be adjusted.
- Choose from any or all of 8 natural bird sounds including predator calls to help scare all birds away.
- Customize by selecting frequency, volume, direction, and hours of operation.
- Weatherproof.
- Harmless: Bird-X-Peller PRO uses natural sounds to chase away the birds, so it doesn't harm them.
- One-time investment solves current and future bird control needs, as you can change the settings as often as the situation changes.

Coverage: up to one acre
Pests: birds (pigeons, sparrows, starlings, seagulls, blackbirds, magpies and more)
Uses: outdoor areas, homes, parks, fields, open lots, canopies, awnings, eaves, rafters, ceilings, entrances, warehouses, hangars, garages, barns, sheds, rooftops, parking lots, buildings and more
