

# Prowler Owl

## Moving owl frightens birds and small animals away

Scare birds away with a dynamic, realistic, visual predator!

### How it Works

The Prowler Owl® decoy resembles the ultimate, most-feared aerial predator. In nature, the owl catches and eats almost anything that moves. Birds instinctually avoid the Prowler Owl®. Don't be fooled by imitations that just sit there! Our owl decoy sets up anywhere - the breeze and its natural appearance do the rest.

### Specifications

- LIFE-SIZE. 4ft wing span.
- MOUNTABLE. Installs anywhere, simply place neck on a ½" diameter pole.
- LONGE RANGE EFFECTIVENESS. If birds can see it they will avoid it.
- PATENTED TECHNOLOGY. Unique airfoil technology.
- DYNAMIC MOVEMENT. Always moving in the breeze.
- HEAVY DUTY MATERIALS. Head is hard resin plastic, body is strong-weave iron hide fabric supported by woven flexible cables and riveted plastic struts.

### Applications

**Pests:** birds (pigeons, sparrows, starlings, crows, blackbirds, seagulls, swallows and other birds), small animals (rodents, rabbits and more)

**Uses:** parks, gardens, yards, rooftops, golf courses, marinas, trees, other open areas

### Recommendations

PROWLER OWL can be used alone or in combination with electronic acoustic devices or chemical repellents. SYNERGY (combining types of scares) is always the most effective approach to pest bird control.

**PLEASE NOTE: We recommend protecting the owl from gusty and extreme winds as strong winds may cause damage to the moving wings.**
