

Super BirdXPeller PRO (SBXP-AU)

Programmable species-specific bird repeller – control box & 4 speakers cover up to 6 acres.

Control birds over wide areas with sophisticated sonic technology.

Sonic programmable bird repeller uses birds' own natural distress calls to create a "danger zone" and "No-GO" zone.

- Sounds play for a few seconds each cycle. Cycle length may be adjusted.
- Choose from any or all of 8 natural bird sounds including predators to help scare away all birds
- Customize by selecting frequency, volume, direction, and hours of operation
- Control box plus four separate directional speakers, each with 100 feet (30m) of wire. Convenient and flexible coverage
- One-time investment solves current and future bird control needs, as you can change the settings as often as the situation changes

Coverage: up to six acres

Pests: birds (pigeons, sparrows, starlings and more)

Uses: outdoor areas, parks, open lots, entrances, warehouses, hangars, garages, barns, sheds, rooftops, parking lots, airfields, fields, vineyards, landfills, large buildings and more
